

***Alpha Design Labs by Furutech Ships GT40 24/96 USB DAC  
Featuring a MM and MC Phono Stage... Records Vinyl and Other Analog Sources  
Now Shipping and an Exceptional Value at \$480!***

Tokyo, Japan • December 1<sup>st</sup>, 2010 • Furutech Co., Ltd., manufacturer of analog and digital audio and video cable plus a wide range of accessories, debuts ADL (Alpha Design Labs), quality products built to Furutech's Pure Transmission standards at surprisingly affordable prices. ADL's first product release is the long-awaited GT40 24/96 USB DAC/Analog Recorder, now shipping.

***The ADL GT40 24/96 USB DAC/Analog Recorder***

The designed in-house GT40 – stylish and compact – self-installs and dramatically improves computer-based audio from both speakers and headphones. It's designed for those with growing music collections on their computer hard drives that want (need!) High End sound and an easy way to archive LPs or other analog sources, a first in its product class.

The GT40 records at 16/44.1 or 24/96 using bidirectional USB and switchable Line or MM/MC Phono Stage inputs, plus it features L/R analog outputs, a separate headphone amplifier, gold-plated Teflon-insulated RCA jacks mounted in a high-quality aluminum chassis with a beautifully machined volume knob. CD Redbook 16/44.1 and especially 24/96 files reveal a vivid, captivating sound unheard of at this price... wired with Furutech's Formula 2 USB cable of course!

***GT40 Sound***

The GT40 brings High End sound to your system in the following way: Recall any visit to a fellow audio enthusiast's home. As music plays you can immediately hear if the sound "sets up" in an audiophile way: A sense of spaciousness, imaging, out-of-the-speaker sound, open highs and an inviting midrange over tight bass. The ADL GT40 brings Furutech's signature sound of smooth, wideband, detailed clarity to desktop systems, especially with high resolution 24-bit/96kHz files, but music at 16/44.1 also sounds much improved. Your first impression will be that you've never experienced compute files sound so open!

***GT40 Power Train***

The heavily-shielded audiophile-grade GT40 features a trusted low-latency USB 2.0 ASIO audio driver that plays and records up to 96kHz. It's completely plug-and-play; the operating system installs the GT40 as soon as the USB connection is made. While completely USB powered device might be convenient it simply won't develop the power required for high-resolution playback, so the GT40 sports an external supply to remedy the issue.

*Just under six inches wide and two-and-a-quarter high means the GT40 USB DAC/Analog Recorder is easy to place and enjoy.*

GT40 USB DAC Specifications	
Connectivity	USB B Connector Analog input/output on RCAs
USB Playback Resolution	24-bits / 96kHz
USB Recording Resolution	32kHz / 44.1kHz / 48kHz / 96kHz
Frequency response	20Hz ~ 20kHz (40Hz: +0.5 dB, 15kHz: -0.5dB)
S/N ratio	-90dB (A-weighted)
Line Output Level	1V RMS
Line Input Level	MC 0.4mV / MM 5mV / Line 1V
Phono Input Impedance	47kOhms MM/MC
MC input to LINE output	62.5dB@1k Hz plus 6dB Line level gain
MM input to LINE output	48.5dB@1k Hz plus 6dB Line level gain
Maximum input level MC	0.4mV RMS
Maximum input level MM	5.0mV RMS
Maximum input level Line	1V RMS @ 1K Hz
Recommended headphones impedance	16 to 300 ohm
Maximum headphone power	80mW / 32Ω

Power	External AC Adaptor
Dimensions	150mm/5.9" (W) x 111mm/4.4" (D) x 57mm/2.25" (H)
Weight:	785g / 1.5lb

## ***Drive Your Computer Music System to First In Class!***

### ***About Alpha Design Labs***

Furutech is justifiably proud of its reputation for engineering, build quality and performance. ADL was created by Furutech to imbue its Pure Transmission Technology into carefully engineered innovative designs that everyone can afford for creating high-level computer-based sound. ADL components are made with the same dedication to total resonance control and refinement as all of Furutech's many cables and accessories.

### ***About Furutech***

Furutech makes a wide variety of high performance 15A and 20A A/V cable and power connectors and parts, as well as distribution/filtering products including the 120Hz standard xv1.3 HDMI cable, GT2 USB 2.0 and GT3 USB 3.0 cables, Ag-12 Silver Tonearm Cable, The Silver Arrows Tonearm Cable, La Source Headshell Wires, Monza LP Stabilizer Weight, the new Lineflux and Evolution II series, Pure Power 6, e-TP4+4, e-TP609, e-TP615 and e-TP60 Power Distributors, and e-TP80 Power Filters, deMag Disc and Cable Demagnetizer, PC-2 Disc Pure Cleaner, and their own very special NANO Liquid Contact Enhancer, plus even more fine cable and OEM products.
